

Fort Myers Beach Drivers Now Have an Easier Way to Pay for Parking

PassportParking® mobile app launches in Fort Myers Beach

Fort Myers Beach, FL (November 30, 2017) – Paying for Parking just got easier for drivers in The Town of Fort Myers Beach. Today the town announced the launch of a mobile application for quicker parking payments. The PassportParking® app is powered by [Passport](#), the global leader for parking and transit payments across cities and universities throughout North America.

The town collaborated with PassportParking for the mobile parking app for a simpler way for drivers to pay for their parking sessions. Drivers can also use the app to:

- Monitor their parking sessions
- Extend time remotely (to posted limits)
- View payment history
- Receive email receipts

The PassportParking app can be used to pay for parking on the go, without having to dig for coins in over 300 parking spaces across Fort Myers Beach. The same application has also been available in nearby Fort Myers, where parkers have adopted it well.

“Passport is excited to introduce our innovative mobile pay technology to Fort Myers Beach,” said Sarah Russell, project manager at Passport. “We’re excited to bring a mobile option to the town that seamlessly combines paying for parking with managing and extending a parking session in just a few steps.”

PassportParking is free to download through the [App Store](#) or [Google Play](#). Users can also manage their parking at ppprk.com.
