Site Fill Grading Affidavit

If this project is not in a subdivision subject to an active Development Order, will the fill material to be placed on lots raise the elevation more than an **average of 6 inches** above any adjacent developed lot? Yes No

Pool Enclosure Affidavit

This is to certify that I am applying for a Pool permit and I understand that the enclosure will be a separate permit. Furthermore, I understand that in accordance with Building and Zoning regulations for the Town of Fort Myers Beach **a permanent enclosure must be in place and an enclosure permit posted prior to a final inspection and certificate of compliance being issued for my permit.**

Under penalties of perjury, I declare that I have read the foregoing and that the facts stated in it are true.

This application is for a permit to do the work and installation as indicated. No work or installation has commenced prior to the issuance of a permit and all work will be performed to meet the standards of all laws regulating construction in this jurisdiction. I understand that a separate permit must be secured for **electrical work, plumbing, signs, wells, pools, furnaces, boilers, heaters, tanks and air conditioners, etc.** The foregoing information is accurate, and all work will be done in compliance with all applicable laws regulating construction and zoning.

Under penalties of perjury, I declare that I have read the foregoing and that the facts stated in it are true.

COMMUNITY DEVELOPMENT

Residential Swimming Pool, Spa & Hot Tub Safety Act Requirement

PERMIT: _____ DATE: _____

PROPERTY ADDRESS: _____

I, _____, License number: _____

(Please print contractor name)

Hereby affirm that one of the following methods will be used to meet the requirements of Chapter 515, Florida Statutes:

- The pool will be isolated from access to the home by an enclosure that meets the pool barrier requirements of Florida Statute, Section 515.29.
- The pool will be equipped with an approved safety pool cover that complies with ASTM F1346-91 (Standard Performance Specifications for Safety Covers for Swimming Pools, Spas, and Hot Tubs).
- All doors and windows providing direct access from the home to the pool will be equipped with an exit alarm that has a minimum sound pressure rating of 85 decibels at 10 feet; **ALL ALARMS MUST BE PERMANENTLY ATTACHED (SCREWED IN) TO ALL WINDOWS AND DOORS LEADING TO POOL AREA.**
- All doors providing direct access from the home to the pool will be equipped with a self-closing, self-latching device with a release mechanism placed no lower than 54" above the floor or deck.

In addition:

- If a fixed barrier is to be used in place of the screen around the perimeter of the pool, no property perimeter fence will be required. If a removable child barrier is used, one end shall not be removable without the aid of tools. (Manufacturer's specifications and barrier location sketch must be submitted.)
- If a Baby Barrier around perimeter of pool is not permanently affixed to the pool deck, a property fence will be required. All fences must be a minimum 48" high, with 54" high gate latches. All gates shall swing to the outside and be self-closing and self-latching.

I understand that a barrier must be placed around the perimeter of the pool and must be separate from any fence, wall, or other enclosure surrounding the yard unless the fence, wall, or other enclosure or portion thereof is situated on the perimeter of the pool, is being used as part of the barrier, and meets the barrier requirements of this section. I also understand that not having one of the above installed at time of final inspection will constitute a violation of Chapter 515 F.S.

COASTAL HIGH HAZARD AREAS (V ZONES)

POOLS – SPAS – WATER FEATURES

Located within the areas of special flood hazard are areas designated as coastal high-hazard areas or “V” zones. These areas have special flood hazards associated with wave wash and scour, therefore the following additional provisions shall apply:

The Design Professional must certify that the pool, spa, or water feature, including deck and foundation, either at-grade or elevated, has been designed and site located to assure that:

- It will not be subject to breaking up or floating out of the ground
 - It will not increase wave or debris impact forces during the storm surge water forces of a coastal flood
 - It will not increase the damage potential or jeopardize the integrity to the foundation and elevated portion of any nearby buildings
Reference: FBC 2010 Sec. 3109.7
-
- Pools, spas, and water features in a “V” zone **seaward** of the CCCL **must** be pile supported and the statements above **must** be included by the Design Professional
 - Pools, spas, and water features in a “V” zone **landward** of the CCCL **do not** need to be pile supported but the statements above **must** be included by the Design Professional
